

Prairie Sage, CO

A GRASSROOTS CAMPAIGN TO BUILD AN ECOTOWN

Imagine...

300 homes wrapped around a village center, with a food coop, community and entertainment spaces, two biodynamic farms, community gardens, car-free pedestrian walkways, a 30-carshare program, shuttles to town, dance nights, bluegrass Fridays, a café, BBQ grills, tool shed, share shed, three cohousing 'very green' pods, a ring of smaller 'simple living' homes and on the perimeter, low-impact hand-built alternative building projects...

**Is this doable in Colorado in 2011?
Absolutely!**

***We spend 1,000,000 minutes working to pay for our houses.
Why not take 5 minutes to build a place where you really want to live!***
